

Many platforms demand high connectivity, which is a problem in many places, depriving many young students of access to education.

INTERNET

Many students don't develop social and soft skills at school.

CARELESS SKILLS

WHY DISVIRTUAL?

TECHNOLOGY

Technological resources are limited in public schools, so in general, accessing virtual education through these can be an inconvenience due to the many resources requested by educational platforms.

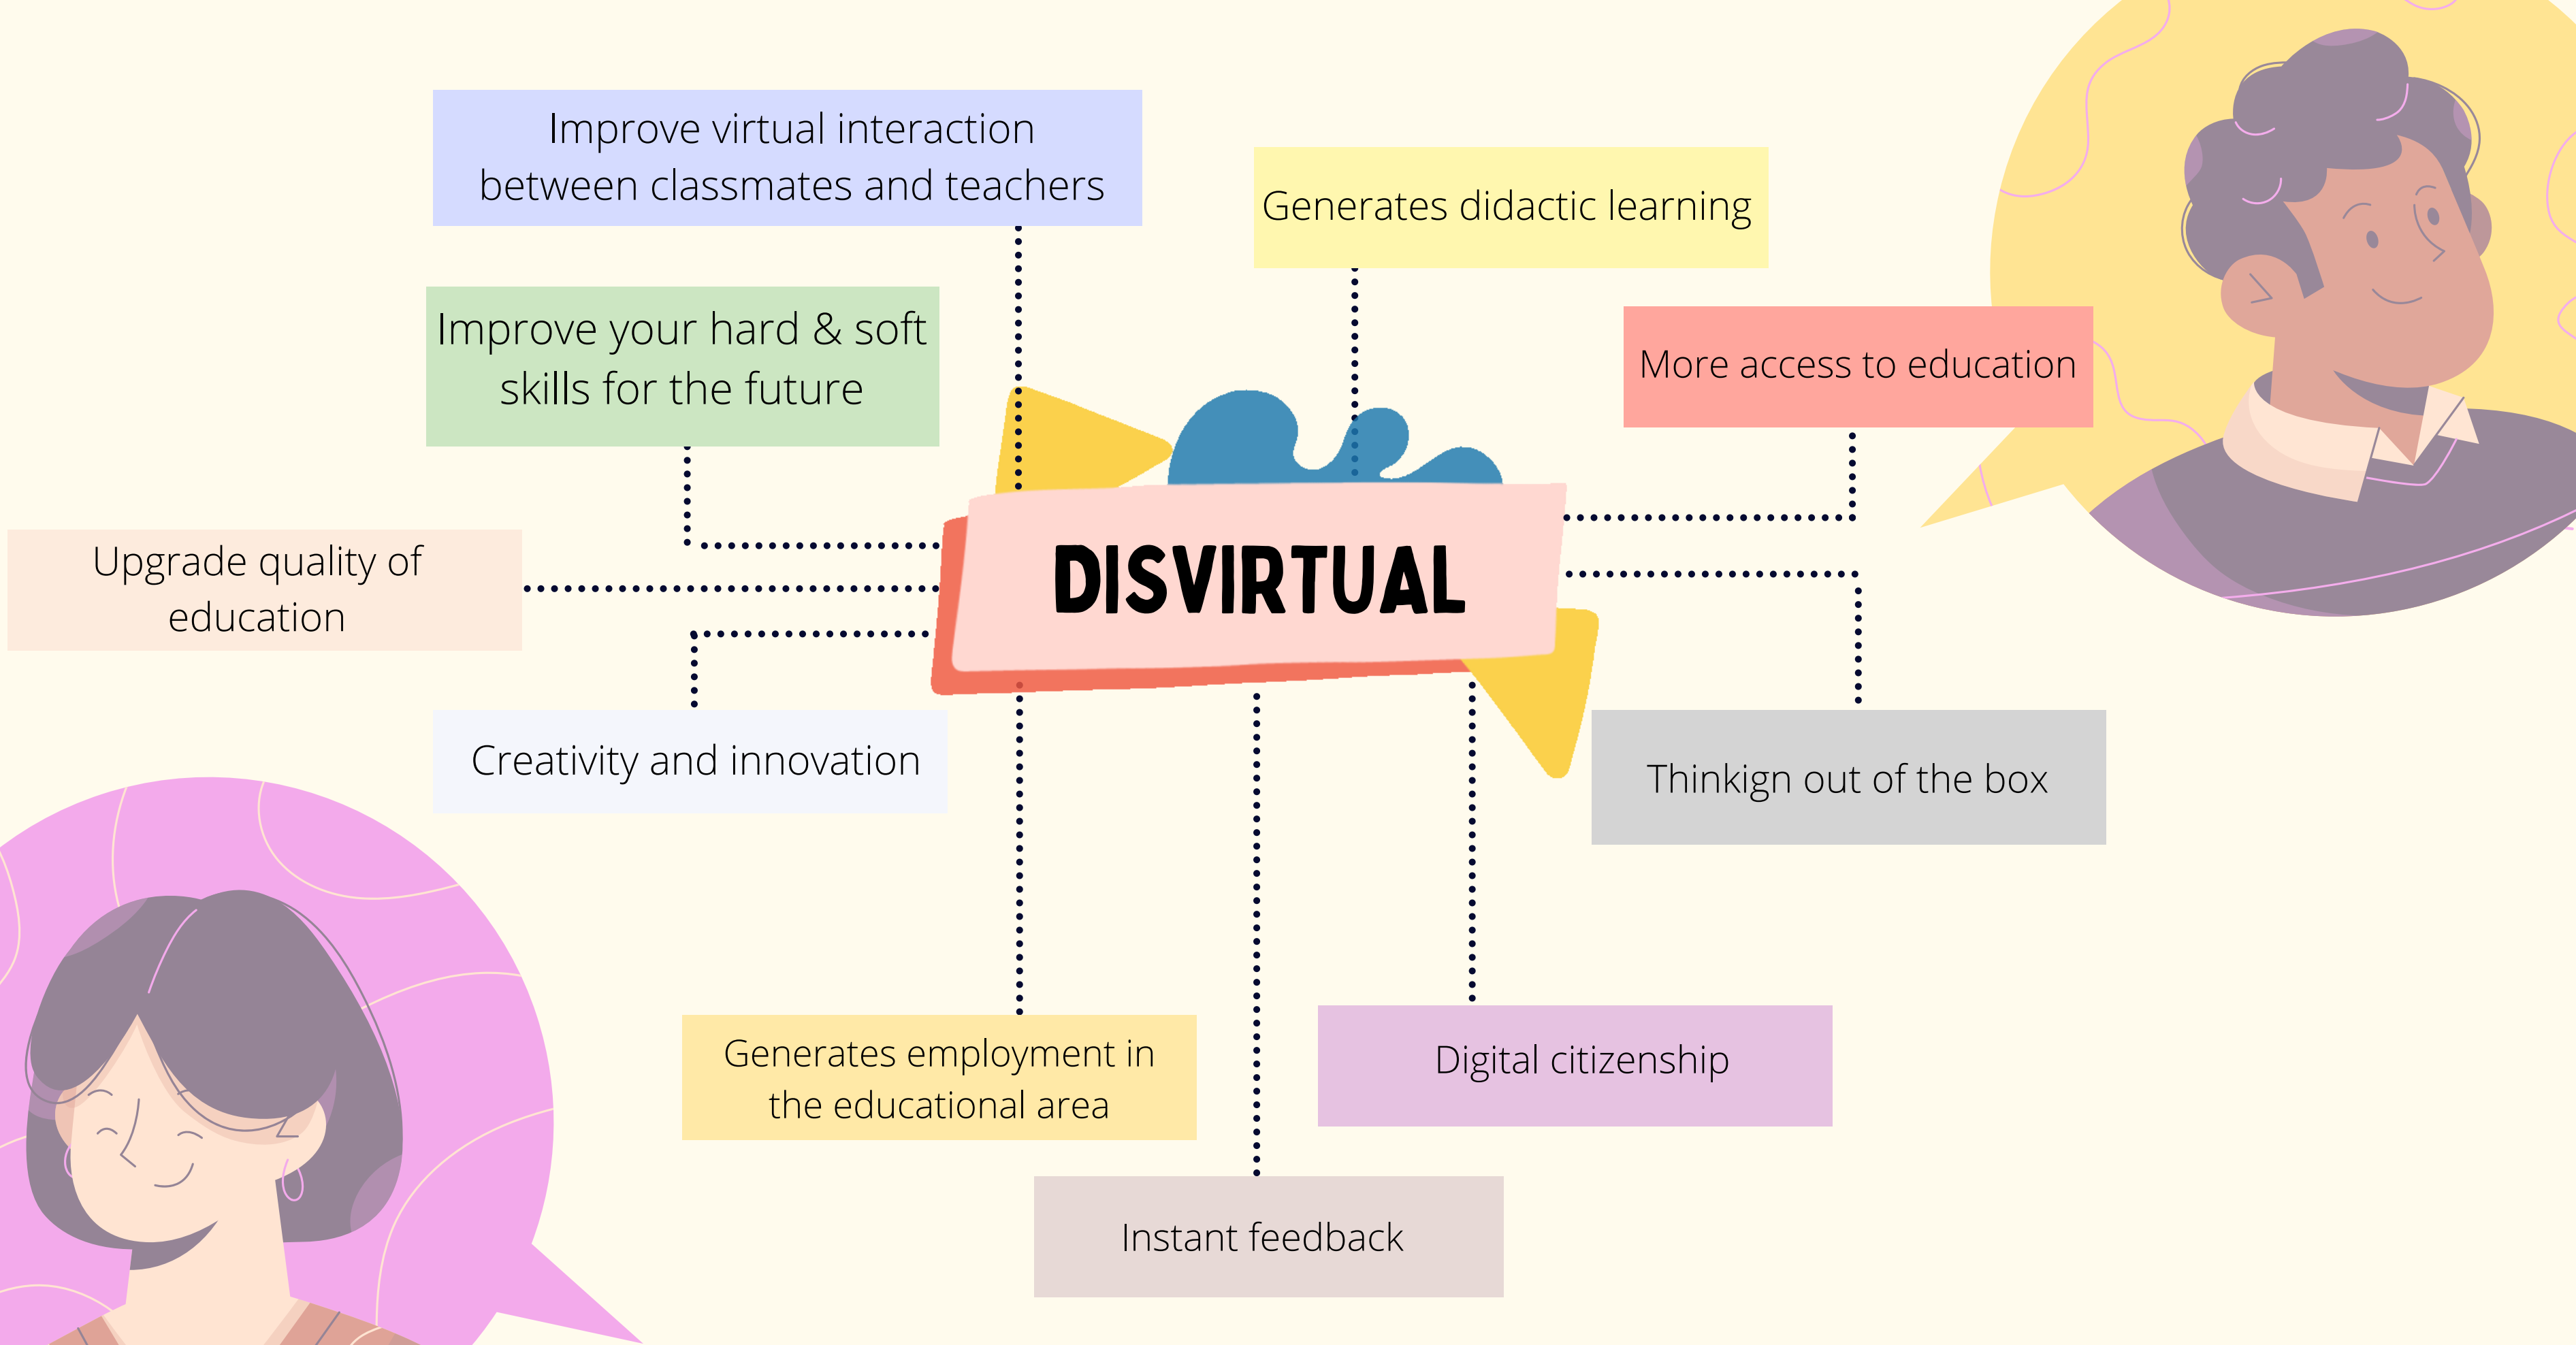

ECONOMY

Many schools in Peru don't have the financial support to have an educational platform. This means that students can't be part of virtual education.

EDUCATION

Public education doesn't implement new learning and assessment strategies for students.
