

9-10 NOV. 2021
IN EUROPE AND BEYOND

Dissemination of clinical best practices with training services which can encourage the introduction of Artificial Intelligence in physicians' daily routines.

Abstract:

The current pandemic context emphasized the need of shifting Healthcare towards models able to overcome distances and spatial constraints in order to guarantee the continuity of welfare programs. This urgency is reflected in the necessity of delivering the same quality standards for every healthcare provision throughout different contexts such as suburbs, rural areas and metropolis.

To achieve this goal, training of physicians is a critical issue: thus, SynDiag brings this challenge about the dissemination of clinical best practices, with the help of Artificial Intelligence, to the attendants of Digital Education Hack providing its pluriannual expertise in developing Digital Academies for Gynaecologists with different experience thanks to an AI-based platform.

Challenger:

Giulio Perotti, Business Developer SynDiag srl

Desired impact:

- Clinical routine improvement of physicians, belonging to distinct countries, with best practices knowledge transfer from colleagues with more experience.
- Alignment of health systems quality standards throughout different nations

Expected Outcome:

- Quicker and more accurate provision of training services towards physicians with different backgrounds and experiences, in order to promote the introduction of AI-based solutions which can improve their clinical practices and healthcare facilities workflow.

Available input:

- SynDiag team expertise and experience in the Gynaecological branch, with the support of Digital Academy use case.
